Order Patent and Trademark File Histories Through Dialog

Thomson File Histories are now available directly through *Dialog*. Combined with the comprehensive patent and trademark information on *Dialog*, file histories give you the most complete view of a patent or trademark and its history in one place. When searching in the following patent and trademark databases, a link to an online order form is displayed in your search results, saving you time in obtaining the file histories you need.

Thomson File Histories are available from the following *Dialog* databases:

- CLAIMS/Current Patent Legal Status (File 123)
- CLAIMS/U.S. Patents (File 340)
- Chinese Patent Abstracts in English (File 344)
- Derwent Patents Citation Index (File 342)
- Derwent World Patents Index (for users in Japan) (File 352)
- Derwent World Patents Index First View (File 331)

*** ANNOUNCEMENTS ***

"Thomson File Histories" are now available directly through Dialog in selected patent and trademark files. Combined with the comprehensive patent and trademark information on Dialog, file histories give you the most complete view of a patent or trademark and its history in one place. When searching in one of the patent and trademark databases, a link to an online order form is displayed in your search results, saving you time in obtaining the file histories you need. See HELP FILEHIST for more information about how to use the link and a list of files that contain the link.

Lead Paragraph:

As events in the automotive industry go, this one was as business-as-usual as they come. It was executed quickly, quietly and professionally. It involved just a handful of people, and was judged a success by the "host" company. Just a simple business deal involving a few players, like the thousands that occur throughout the world every day. Even though there were no executive speeches, press conferences or next-day headlines, the event ignited a buzz, for two reasons. Nothing like it had ever happened before. And much of what happens after it will likely never be the same.

Lead Paragraph:

The use of "smart" pricing can boost profits and maximize customer satisfaction. Smart pricing is dynamic pricing, and entails a company adjusting prices, even on a daily basis, to reflect changing market

conditions, consumer demand, and product valuation. It is a value-based strategy that demands that companies have accurate information regarding market demand and profit margins on each item sold. Smart prices take into consideration differences in the costs of serving different market segments and the different valuations of the product by different segments. Several approaches to smart pricing that allow companies to sell their products or services at two or more prices are discussed under the following headings: premium product pricing, prime location pricing, enhanced warranty pricing, priority service pricing, off-peak pricing, and customer-segment pricing.

Selecting the right price for a product or service can have a significant impact on the bottom line. McKinsey & Co., in a study of 1,000 firms, found that a one percent increase in price -- with constant sales -- resulted in an average increase in profitability of 7.4 percent. The McKinsey study also showed that the effect of pricing on profitability was even stronger than that of increasing sales volume or reducing costs.(FN1) An understanding of the fixed and variable costs associated with a product is critical in selecting an optimal price. However, pricing should not only reflect costs, but also take into consideration the value customers place on the product or service.
